

## information technology

In today's technology-driven market, a strong IT partner is a must for business success. Our proven team at Shamrock provides our clients with the solutions that help yield higher productivity and performance from their systems investments, as well as integrating new programs and technology for seamless—and more efficient—operations.

Shamrock's Information Technology services are grounded in strategic planning. We develop systems that can adapt to your company's growing needs. Whether you need to install a new network, upgrade an existing system, implement a new systems function, or you require on-site desktop assistance, Shamrock provides the support you need to perform at your best.

We specialize in custom software, hardware, programming, systems and database applications, incorporating these functions to blend with your existing technology and systems, or developing them from the ground up to meet your requirements.

In addition, our IT group provides expert support for Shamrock's comprehensive eCommerce platform of products and services. We not only know how these systems work—we know how to make them work best for you. Our tech-savvy team integrates each of Shamrock's eCommerce programs to meet your specific requirements, while ensuring that the program delivers its maximum productivity and ultra-efficient operations for that specific application.

In short, our capable team covers it all, from programming, to retrofitting, to install. Shamrock's full menu of IT capabilities include:

- Ⓢ Database management
- Ⓢ Programming
- Ⓢ Desktop support
- Ⓢ Server maintenance
- Ⓢ Technical consulting
- Ⓢ Application and office software
- Ⓢ Hardware sales
- Ⓢ Network design and implementation
