

THE UBILL ADVANCE ADVANTAGE

UBill is a simple yet comprehensive way to manage the entire billing cycle—from printing and distributing bills, to collection of payment. With UBill, transmit data from your current software system once and we can distribute it using multiple channels of your choosing.

Whether you choose traditional print and mail services, electronic services, or a combination of both, you can be assured that all channels of communication will be synchronized. As a result, most UBill clients experience:

- Department-wide cost reductions
- Improved office efficiency
- Greater customer satisfaction
- Accelerated cash collections

The Smart Solution for billing management

The Complete Billing and Collection Solution for Your Business.

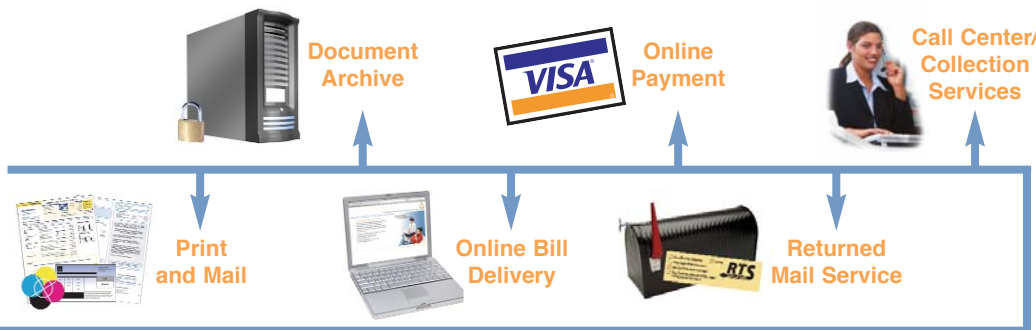

With UBill, send your data out once and get multiple-channel distribution.

Your Company

Billing Data from You

Program Benefits:

Flexible. With a host of template products available—in both print and electronic formats—you can now provide your customers with a customized, user-friendly statement at a fraction of the cost of designing and distributing your own bill.

Lucrative. Our expedient processing gets your billing statements issued quickly, allowing for faster turnaround, and increased cash flow.

Cost-effective. Taking advantage of the economies of scale, we process and print billing statements in large units at a significant cost savings over individual print runs.

Reliable. Our proven systems were developed expressly for issuing customer statements, as well as detailed distribution reports, with precise accuracy and efficiency.

Smart. Encompassing the complete billing and collection process, **UBill Advance** helps collect cash more efficiently.

Program Components:

Print & Mail

When it comes to processing and mailing statements, marketing campaigns, or welcome letters, efficiency and accuracy are critical. With that in mind, **UBill Advance** has engineered data management systems to meet customers' stringent requirements.

Document Archive

With **UBill Advance**, your documents can be archived and managed electronically. Electronic documents are created from the print stream that is used to generate paper documents. These electronic documents are mirror images of paper documents. This process is the foundation for **UBill Advance's** online bill delivery & payment solutions.

Online Bill Delivery

UBill Advance allows you to quickly and easily offer Online Bill Delivery, reducing billing and customer service costs.

- Makes bills available for viewing and downloading on a Web site
- Send bills to an e-mail address as encrypted attachments
- Certify delivery of documents to the recipient's e-mail inbox

Online Payment

With the increased use of technology in our everyday life, customers expect more options in bill payment.

UBill Advance provides the ability to handle both credit card and electronic funds transfer debits (commonly known as e-checks), and includes a broad range of payment services. These include the ability for customers to make payments without registering and to schedule future payments to be made automatically.

Returned Mail Service

Sending bills to incorrect addresses can drain internal resources. Let **UBill Advance** return mail service help find correct addresses and reduce the expense of sending accounts to collection.

Call Center/Collection Services

Utilizing state-of-the-art software, our high-tech call center provides our clients with the comfort of highly efficient and quality processing that gets results.

Our services include:

- Inbound/Outbound Calls
- Accounts Receivable Management
- Broadcast Messaging
